# QUARTERLY BANKING PROFILE: FIRST QUARTER 2026

Net income for the 4,278 FDIC-insured commercial banks and savings institutions totaled $80.5 billion, up $2.8 billion (3.6 percent) from the prior quarter. The rise in quarterly earnings was driven by robust growth in noninterest income at larger institutions but was partially offset by higher noninterest expenses and lower net interest income. More than half of all banks (55.2 percent) reported net income higher than the prior quarter. The banking industry reported an aggregate return on assets (ROA) ratio of 1.26 percent in first quarter 2026, up from 1.23 percent in fourth quarter 2025 and up from 1.16 percent in the year-ago quarter. See page 1.

## COMMUNITY BANK PERFORMANCE

Community banks—which represent 90 percent of insured institutions—reported quarterly net income of $8.1 billion in first quarter 2026, up $302.7 billion (3.9 percent) from the previous quarter. The increase was driven by lower provisions and noninterest expense that offset lower noninterest income and net interest income. The pretax ROA ratio at community banks increased 7 basis points from the prior quarter and increased 26 basis points from the year-ago quarter to 1.42 percent. More than half (55.8 percent) of all community banks reported a quarter-over-quarter increase in net income. See page 17.

## INSURANCE FUND INDICATORS

The Deposit Insurance Fund (DIF) balance increased $3.6 billion to $154.7 billion. The rise in the DIF was primarily driven by assessment income of $3.1 billion, followed by $1.2 billion in interest earned on investment securities. Growth to the DIF over the quarter was partially offset by unrealized losses on available-for-sale securities of $280 million and operating expenses of $526 million. One institution failed during the first quarter. The DIF reserve ratio was 1.43 percent on March 31, 2026, up 1 basis point from the previous quarter and 12 basis points higher than the previous year. See page 29.

# INSURED INSTITUTION PERFORMANCE

**Quarterly Net Income Rose from the Prior Quarter and the Year-Ago Quarter**
**Net Interest Margin (NIM) Decreased from the Prior Quarter to 3.31 Percent**
**Loan Growth Continued, Rising 7.1 Percent from the Year-Ago Quarter**
**Domestic Deposits Increased for the Seventh Consecutive Quarter**
**Asset Quality Metrics Remained Generally Favorable**
**The Deposit Insurance Fund (DIF) Reserve Ratio Increased to 1.43 Percent**

## QUARTERLY NET INCOME ROSE FROM THE PRIOR QUARTER AND THE YEAR-AGO QUARTER

Quarterly net income totaled $80.5 billion in first quarter 2026, up $2.8 billion (3.6 percent) from the prior quarter.  The rise in quarterly earnings was driven by robust growth in noninterest income (up $5.0 billion, or 5.8 percent) at larger institutions but was partially offset by higher noninterest expenses (up $2.5 billion, or 1.6 percent) and lower net interest income (down $1.6 billion, or 0.8 percent). The return on assets (ROA) ratio was 1.26 percent in first quarter 2026, up from 1.23 percent in fourth quarter 2025 and up from 1.16 percent in the year-ago quarter. More than half of all banks (55.2 percent) reported higher net income from the prior quarter.

Quarterly net income increased $10.1 billion (14.3 percent) from the year-ago quarter. The annual increase in net income was driven by higher net interest income (up $13.0 billion, or 7.3 percent) and higher noninterest income (up $7.1 billion, or 8.5 percent) but was partially offset by higher noninterest expense (up $10.6 billion, or 7.1 percent).

## NIM DECREASED FROM THE PRIOR QUARTER TO 3.31 PERCENT

The banking industry reported NIM of 3.31 percent in first quarter 2026, down 8 basis points from the prior quarter. The quarterly decline in NIM was due to the yield on earning assets falling (down 21 basis points) at a faster rate relative to the cost of funds (down 13 basis points).

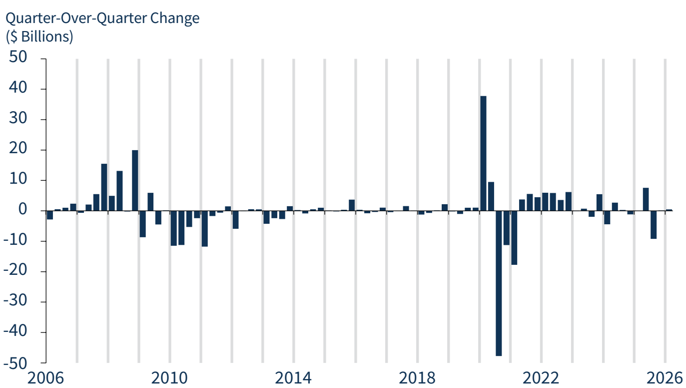
## NET OPERATING REVENUE INCREASED IN THE FIRST QUARTER

Net operating revenue (net interest income plus noninterest income) increased $3.4 billion (1.2 percent) from the prior quarter to $282.7 billion. The quarterly increase was led by noninterest income (up $5.0 billion, or 5.8 percent) as net gains on loan sales rebounded from last quarter's loss and trading revenue expanded. Net interest income declined $1.6 billion (0.8 percent) as interest income (down $7.3 billion, or 2.3 percent) had a larger dollar decline relative to interest expense (down $5.7 billion, or 4.7 percent).

## NONINTEREST EXPENSE INCREASED FROM THE PRIOR QUARTER AND THE YEAR-AGO QUARTER

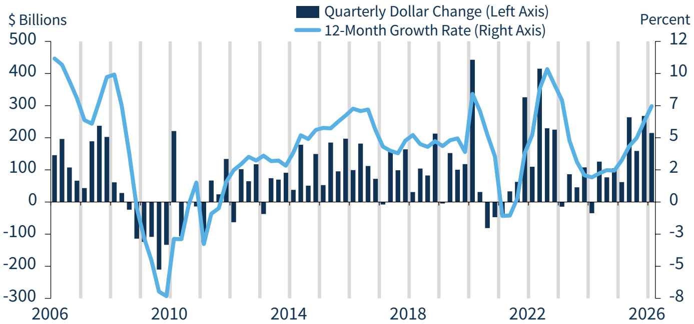
Noninterest expense increased $2.5 billion (1.6 percent) from the prior quarter and $10.6 billion (7.1 percent) from the year-ago quarter to $159.8 billion. The quarterly increase was driven by higher salaries and employee benefits (up $4.5 billion, or 6.0 percent) but was partially offset by "all other" noninterest expense, which declined $1.8 billion (2.6 percent).[1] The annual increase was driven by higher salaries and employee benefits (up $5.0 billion, or 6.8 percent) and "all other" noninterest expense (up $4.8 billion, or 7.8 percent).

### Chart 3
**Change in Quarterly Credit Loss Provisions**
All FDIC-Insured Institutions



Source: FDIC.

### Chart 4
**Quarterly Change in Loan Balances**
All FDIC-Insured Institutions



Source: FDIC.
Note: ASC Topics 810 and 860 resulted in the consolidation of large amounts of securitized loan balances back onto banks' balance sheets in the first quarter of 2010. Although the amount consolidated cannot be precisely quantified, the industry would have reported a decline in loan balances for the quarter absent this change in accounting standards.

[1] "All other" noninterest expense includes expenses related to data processing, advertising and marketing, legal fees, and consulting and advisory fees.

## PROVISION EXPENSE ROSE FROM THE PREVIOUS QUARTER BUT DECLINED FROM THE YEAR-AGO QUARTER

Quarterly provision expense totaled $21.4 billion in the first quarter, up $475.2 million (2.3 percent) from the previous quarter but down $1.0 billion (4.6 percent) from the year-ago quarter. Provision expense exceeded total net charge-offs during the quarter. The reserve coverage ratio (the ratio of the allowance for credit losses to noncurrent loans) declined from the prior quarter to 166.8 percent, as the increase in noncurrent loan balances (up $4.4 billion, or 3.3 percent) outpaced the increase in the allowance for credit losses (up $1.6 billion, or 0.7 percent).

## ASSET QUALITY METRICS REMAINED GENERALLY FAVORABLE

Past-due and nonaccrual (PDNA) loans, or loans that are 30 or more days past due or in nonaccrual status, decreased 3 basis points from the previous quarter to 1.53 percent. PDNA rates for credit card loans (down 7 basis points to 3.08 percent) and auto loans (down 42 basis points to 2.64 percent) declined on a seasonal basis from the previous quarter. PDNA rates increased for 1–4 family residential loans (up 5 basis points to 2.08 percent) and nonfarm nonresidential commercial real estate (CRE) loans (up 3 basis points to 1.65 percent). PDNA rates for multifamily CRE, non-owner-occupied CRE, credit card portfolios, and auto loans remained elevated.

The industry's net charge-off rate decreased 4 basis points to 0.59 percent from the prior quarter and was 8 basis points lower than the year-ago quarter. Most of the quarterly decline was led by nonfarm nonresidential net charge-offs.

## UNREALIZED LOSSES ON SECURITIES INCREASED FROM FOURTH QUARTER 2025

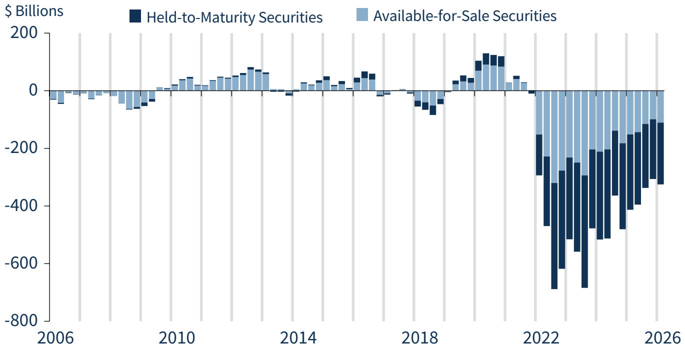
Unrealized losses on securities totaled $325.1 billion, up $19.0 billion (6.2 percent) from the prior quarter but down $88.1 billion (21.3 percent) from the year-ago quarter.[2] Unrealized losses on available-for-sale securities were $110.6 billion, up $11.9 billion (12.0 percent) from the prior quarter but down $40.9 billion (27.0 percent) from the year-ago quarter. Unrealized losses on held-to-maturity securities were $214.5 billion, up $7.2 billion (3.4 percent) from the prior quarter but down $47.2 billion (18.0 percent) from the year-ago quarter. The 30-year mortgage rate remained relatively flat during the first two months of the quarter but rose in March, decreasing the value of mortgage-backed securities reported by banks and increasing unrealized losses.

## BANKING INDUSTRY ASSETS INCREASED IN FIRST QUARTER 2026

The banking industry reported total assets of $26.1 trillion in the first quarter, an increase of $888.0 billion (3.5 percent) from the prior quarter and $1.6 trillion (6.6 percent) from the year-ago quarter. The quarterly increase was led by higher assets in trading accounts (up $253.0 billion, or 22.8 percent), total loans and leases (up $215.0 billion, or 1.6 percent), and cash and balances due from depository institutions (up $113.6 billion, or 4.4 percent). On an annual basis, growth in total loans and leases (up $905.5 billion, or 7.1 percent), assets in trading accounts (up $255.1 billion, or 23.0 percent), and securities (up $201.6 billion, or 3.6 percent) drove the increase.

### Chart 7

### Unrealized Gains (Losses) on Investment Securities

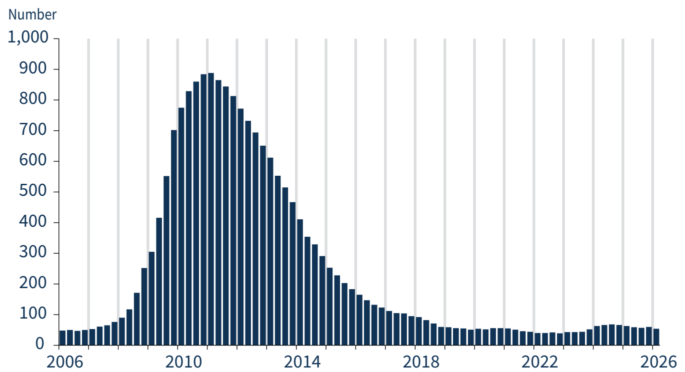


Source: FDIC.
Note: Insured Call Report filers only. Unrealized losses on securities solely reflect the difference between the market value and book value of non-equity securities as of quarter end. This chart does not reflect unrealized gains or losses in other parts of the balance sheet.

### Chart 8

### Number of Banks on the "Problem Bank List"

All FDIC-Insured Institutions



Source: FDIC.

[2] Unrealized losses on securities reflect the difference between the market value as of quarter-end and the book value of non-equity securities. This calculation does not account for any unrealized gains or losses in accumulated other comprehensive income because these cannot be derived from Consolidated Reports of Condition and Income (Call Reports).

## LOAN GROWTH CONTINUED TO EXPAND AND ROSE 7.1 PERCENT FROM THE YEAR-AGO QUARTER

Total loan and lease balances increased $215.0 billion (1.6 percent) from the prior quarter to $13.7 trillion. The largest dollar increases among reported categories were commercial and industrial loans (up $96.2 billion, or 4.0 percent), loans to nondepository financial institutions (up $62.3 billion, or 4.4 percent), loans to purchase or carry securities, including margin loans (up $39.8 billion, or 7.9 percent), and nonfarm nonresidential CRE loans (up $18.5 billion, or 1.0 percent). A seasonal decline in credit card loans partially offset the quarterly increase in total loans and leases. The industry's loan growth rate in the first quarter was 7.1 percent, the fastest annual growth rate since second quarter 2023.

## DOMESTIC DEPOSITS INCREASED FOR THE SEVENTH CONSECUTIVE QUARTER

Domestic deposits increased $389.7 billion (1.2 percent), the seventh consecutive quarterly increase. Estimated uninsured domestic deposits, which rose $233.5 billion (2.9 percent) from the prior quarter, drove the increase in domestic deposits. Interest-bearing deposits and noninterest-bearing deposits both increased from the prior quarter.

## CAPITAL RATIOS DECLINED FROM THE PRIOR QUARTER

Capital ratios declined due to asset growth coupled with low capital accretion. The tier 1 risk-based capital ratio declined 18 basis points from fourth quarter 2025 to 13.91 percent. The leverage capital ratio decreased 11 basis points from fourth quarter 2025 to 9.15 percent.

## THE NUMBER OF PROBLEM BANKS DECREASED IN THE FIRST QUARTER

The number of banks on the FDIC's "Problem Bank List" decreased by a net of six in the first quarter to 54 banks.[3] The number of problem banks represented 1.3 percent of total banks in the first quarter, which is in the normal range of 1 to 2 percent for non-crisis periods.

## THE DIF RESERVE RATIO INCREASED TO 1.43 PERCENT

The DIF balance increased $3.6 billion to $157.4 billion in the first quarter. The reserve ratio increased 1 basis point during the quarter to 1.43 percent.

## THREE BANKS OPENED IN THE FIRST QUARTER

The number of FDIC-insured institutions declined by 60 during the first quarter to 4,278. Three banks opened during the quarter; six banks were sold to non-FDIC-insured institutions; 54 institutions merged with other banks; and one bank failed during the first quarter.

* See Table IV-A for explanations.
** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.
*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

**TABLE III-A. First Quarter 2026, All FDIC-Insured Institutions**

| FIRST QUARTER (The way it is…) | All Insured Institutions | Asset Size Distribution: Less Than $100 Million | $100 Million to $1 Billion | $1 Billion to $10 Billion | $10 Billion to $250 Billion | Greater Than $250 Billion | Geographic Regions*: New York | Atlanta | Chicago | Kansas City | Dallas | San Francisco |

* See Table IV-A for explanations.
** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.
*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

***Asset Concentration Group Definitions (Groups are hierarchical and mutually exclusive):**
Credit-card Lenders - Institutions whose credit-card loans plus securitized receivables exceed 50 percent of total assets plus securitized receivables.
International Banks - Banks with assets greater than $10 billion and more than 25 percent of total assets in foreign offices.
Agricultural Banks - Banks whose agricultural production loans plus real estate loans secured by farmland exceed 25 percent of the total loans and leases.
Commercial Lenders - Institutions whose commercial and industrial loans, plus real estate construction and development loans, plus loans secured by commercial real estate properties exceed 25 percent of total assets.
Mortgage Lenders - Institutions whose residential mortgage loans, plus mortgage-backed securities, exceed 50 percent of total assets.
Consumer Lenders - Institutions whose residential mortgage loans, plus credit-card loans, plus other loans to individuals, exceed 50 percent of total assets.
Other Specialized < $1 Billion - Institutions with assets less than $1 billion, whose loans and leases are less than 40 percent of total assets.
All Other < $1 billion - Institutions with assets less than $1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.
All Other > $1 billion - Institutions with assets greater than $1 billion that do not meet any of the definitions above, they have significant lending activity with no identified asset concentrations.
** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.
*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

*** Regions:**
New York - Connecticut, Delaware, District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Puerto Rico, Rhode Island, Vermont, U.S. Virgin Islands
Atlanta - Alabama, Florida, Georgia, North Carolina, South Carolina, Virginia, West Virginia
Chicago - Illinois, Indiana, Kentucky, Michigan, Ohio, Wisconsin
Kansas City - Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota
Dallas - Arkansas, Colorado, Louisiana, Mississippi, New Mexico, Oklahoma, Tennessee, Texas
San Francisco - Alaska, Arizona, California, Hawaii, Idaho, Montana, Nevada, Oregon, Pacific Islands, Utah, Washington, Wyoming
** For institutions that have adopted ASU 2016-13, the numerator represents provisions for credit losses on a consolidated basis; for institutions that have not adopted ASU 2016-13, the numerator represents the provision for loan and lease losses. Beginning in 2024, almost all institutions have adopted ASU 2016-13.
*** Beginning March 2020, does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

All line items are reported on a quarterly basis.
* Includes spot foreign exchange contracts. All other references to foreign exchange contracts in which notional values or fair values are reported exclude spot foreign exchange contracts.
** Does not include banks filing the FFIEC 051 report form, which was introduced in first quarter 2017.
*** Derivative contracts subject to the risk-based capital requirements for derivatives.
**** Credit losses on derivatives is applicable to all banks filing the FFIEC 031 report form and banks filing the FFIEC 041 report form that have $300 million or more in total assets, but is not applicable to banks filing the FFIEC 051 form.

* Does not include banks filing the FFIEC 051 report form, which was introduced in first quarter 2017.
** Beginning in June 2018, for banks that file the FFIEC 041 report form, all other loans include home equity loans, credit card receivables, auto loans, other consumer loans, and commercial and industrial loans.
*** Beginning in June 2018, only includes banks that file the FFIEC 031 report form.
**** The amount of financial assets serviced for others, other than closed-end 1-4 family residential mortgages, is reported when these assets are greater than $10 million.
***** Total credit exposure includes the sum of the three line items titled "Total credit exposure" reported above.

# COMMUNITY BANK PERFORMANCE

Community banks are defined by criteria identified in the *2012 FDIC Community Banking Study.*[1] When comparing community bank performance across quarters, prior-quarter dollar amounts are based on community banks designated as such in the current quarter, adjusted for mergers. Prior-quarter ratios are based on community banks designated during the prior quarter.

**Quarterly Net Income and Pretax Return on Assets (ROA) Increased from the Prior Quarter and the Year-Ago Quarter**
**Net Interest Margin (NIM) Decreased from the Prior Quarter and Increased from the Year-Ago Quarter**
**Loan Growth Continued in Most Portfolios**
**Domestic Deposits Increased from the Prior Quarter and the Year-Ago Quarter**
**Asset Quality Metrics Deteriorated Slightly at Community Banks, in Contrast to Larger Firms**

## QUARTERLY NET INCOME AND PRETAX ROA INCREASED FROM THE PRIOR QUARTER AND THE YEAR-AGO QUARTER

First quarter net income for the 3,852 community banks increased $302.7 million (3.9 percent) from the prior quarter to $8.1 billion. The pretax ROA ratio at community banks increased 7 basis points from the prior quarter and increased 26 basis points from the year-ago quarter to 1.42 percent. More than half (55.8 percent) of all community banks reported a quarter-over-quarter increase in net income. Lower provisions (down $488.6 million, or 34.4 percent) and noninterest expense (down $310.0 million, or 1.7 percent) offset lower noninterest income (down $208.0 million, or 4.2 percent) and net interest income (down $101.6 million, or 0.4 percent). The share of community banks that were unprofitable during the quarter was 4.9 percent, down from 7.4 percent in the prior quarter.

[1] The 2012 FDIC Community Banking Study can be accessed here, https://www.fdic.gov/resources/community-banking/cbi-study.html. Additionally, https://www.fdic.gov/community-banking-research-program/reference-data provides a listing of all reporters and their community bank status going back to 1984.

## NIM DECREASED FROM THE PRIOR QUARTER BUT INCREASED FROM THE YEAR-AGO QUARTER

The community bank NIM decreased 6 basis points from the prior quarter but was up 24 basis points from the year-ago quarter to 3.71 percent. Quarter over quarter, average earning asset yields decreased 18 basis points to 5.57 percent, while average funding costs decreased 12 basis points to 1.86 percent. From the year-ago quarter, average earning asset yields rose 4 basis points and average funding costs declined 21 basis points.

## NET OPERATING REVENUE DECREASED IN THE FIRST QUARTER

Community bank net operating revenue (net interest income plus noninterest income) decreased $309.5 million (1.1 percent) to $28.7 billion during the quarter due to decreases in both net interest income and noninterest income. Quarter over quarter, decreases in net interest income (down $101.6 million, or 0.4 percent) were driven by lower real estate loan income. Noninterest income declined $208.0 million (4.2 percent) from the prior quarter driven by decreases in "all other" noninterest income.[2]

Net operating revenue increased $3.1 billion (12.3 percent) from the year-ago quarter as net interest income rose $2.7 billion and noninterest income increased $482.7 million. Increases in "all other" noninterest income drove the annual increase in noninterest income.

[2] "All other" noninterest income includes income related to wire transfers and ATM fees, bank card fees, credit card interchange fees, safe deposit box rent, printing and sale of checks, and earnings on/increase in the cash surrender value of life insurance.

## NONINTEREST EXPENSE DECREASED FROM THE PRIOR QUARTER

Noninterest expense decreased $310.0 million (1.7 percent) from the prior quarter but increased $1.1 billion (6.4 percent) from the year-ago quarter to $17.8 billion. The quarterly decrease was led by a decline in "all other" noninterest expense and salaries and employee benefits expense. Annually, salaries and employee benefits expense and "all other" noninterest expense drove the annual increase. The quarterly efficiency ratio (noninterest expense as a share of net operating revenue) decreased to 61.87 percent from 62.51 percent in first quarter 2026.

## PROVISION EXPENSE DECLINED FROM THE PRIOR QUARTER

Quarterly provision expense of $932.8 million was down $488.6 million (34.4 percent) from the prior quarter and down $118.5 million (11.3 percent) from the year-ago quarter. The reserve coverage ratio (the ratio of the allowance for credit losses to noncurrent loans) decreased 7.8 percentage points from the prior quarter to 146.4 percent as the allowance for credit losses decreased and noncurrent loan balances increased.

## ASSET QUALITY METRICS DETERIORATED SLIGHTLY BUT REMAINED GENERALLY FAVORABLE

The share of loans and leases 30 days or more past due or in nonaccrual (PDNA) status increased 9 basis points from fourth quarter 2025 to 1.44 percent. At 1.44 percent, community bank PDNAs are the highest since the first quarter of 2020 but remain just below the pre-pandemic average of 1.50 percent. PDNA loan balances increased across all major loan categories except consumer loans. The largest increases were in nonperforming nonfarm nonresidential commercial real estate (CRE) loans (up $810.0 million, or 12 basis points to 1.32 percent) and farm loans (up $560.9 million, or 40 basis points to 1.43 percent). Consumer loans decreased $376.2 million (47 basis points) driven mainly by decreases in auto loans (down $331.0 million).

The community bank net charge-off ratio decreased 11 basis points from the prior quarter but increased 2 basis points from the year-ago quarter to 0.18 percent. This ratio was above the pre-pandemic average of 0.15 percent. The year change in net charge-off volume increased across all loan types except consumer loans. Commercial and industrial (up $84.5 million) and nonfarm nonresidential (up $82.5 million) loans drove the largest portion of the annual increase in net charge-off volume.

### UNREALIZED LOSSES ON SECURITIES INCREASED FROM THE PRIOR QUARTER

Unrealized losses on securities totaled $32.2 billion in first quarter 2026, up $2.6 billion (8.9 percent) from the prior quarter but down $9.8 billion (23.2 percent) from the year-ago quarter.[3] Unrealized losses on available-for-sale securities ($26.8 billion) and held-to-maturity securities ($5.5 billion) both increased quarter over quarter. The 30-year mortgage rate remained relatively flat during the first two months of the quarter but rose in March, decreasing the value of mortgage-backed securities reported by banks and increasing unrealized losses.

### TOTAL ASSETS INCREASED FROM THE PRIOR QUARTER AND YEAR-AGO QUARTER

Total assets at community banks increased $26.9 billion (1.0 percent) from the prior quarter and $126.6 billion (4.8 percent) from the year-ago quarter to $2.8 trillion. Total loans and leases increased $16.1 billion (0.8 percent) from the prior quarter and $99.4 billion (5.4 percent) from the year-ago quarter. Cash and balances due from depository institutions increased $5.3 billion (2.6 percent) from fourth quarter 2025 and increased $12.4 billion (6.5 percent) from one year earlier. Securities balances increased $2.4 billion (0.5 percent) from the prior quarter and increased $9.1 billion (1.9 percent) from the year-ago quarter.

### LOAN GROWTH CONTINUED IN MOST PORTFOLIOS

Loan and lease balances increased $16.1 billion (0.8 percent) from the prior quarter to $1.9 trillion. Nearly 58 percent of community banks reported quarterly growth in total loan balances. Growth was broad-based across all major portfolios except agricultural production and auto loans. Increases in nonfarm nonresidential CRE loans (up $7.7 billion, or 1.3 percent) led the quarter-over-quarter growth.

Loan and lease balances increased 5.4 percent from the year-ago quarter. Increases in nonfarm nonresidential CRE loans (up $37.9 billion, or 6.8 percent), 1–4 family residential real estate loans (up $14.9 billion, or 3.3 percent), and commercial and industrial loans (up $11.4 billion, or 5.1 percent) led the growth from the year-ago quarter.

[3] Unrealized losses on securities reflect the difference between the market value as of quarter-end and the book value of non-equity securities. This calculation does not account for any unrealized gains or losses in accumulated other comprehensive income because these cannot be derived from Consolidated Reports of Condition and Income (Call Reports).

## DOMESTIC DEPOSITS INCREASED FROM THE PRIOR QUARTER AND THE YEAR-AGO QUARTER

Community banks reported an increase in domestic deposits of 1.2 percent ($28.0 billion) to $2.3 trillion in first quarter 2026. About 69 percent of community banks reported an increase in total domestic deposit balances from the prior quarter. Community banks reported an increase in estimated insured domestic deposits (up $21.4 billion, or 1.3 percent) and an increase in estimated uninsured domestic deposits (up $7.0 billion, or 1.0 percent). Quarter over quarter, community banks reported an increase in both interest-bearing deposits (up $26.1 billion, or 1.4 percent) and noninterest-bearing deposits (up $1.9 billion, or 0.4 percent). Domestic deposits rose $102.6 billion (4.6 percent) from the year-ago quarter.

## MOST CAPITAL RATIOS INCREASED FROM THE PRIOR QUARTER

The tier 1 risk-based capital ratio for community banks that did not opt into the community bank leverage ratio (CBLR) framework was 14.43 percent, up 13 basis points from the prior quarter. The average CBLR for the 1,681 community banks that elected to use the CBLR framework remained relatively unchanged this quarter at 12.36 percent. The leverage capital ratio for all community banks was 11.15 percent, up 11 basis points from the prior quarter.

## ONE COMMUNITY BANK FAILED IN FIRST QUARTER 2026

The number of community banks declined to 3,852 in the first quarter, down 59 from the prior quarter. Eight banks transitioned from community to noncommunity banks, and one transitioned from a noncommunity to a community bank. One community bank failed during the quarter; one community bank failed after quarter-end and did not file a Call Report; six community banks were sold to non-FDIC-insured institutions; and 44 community banks merged or consolidated during the quarter.

Note: Noncurrent loan rates represent the percentage of loans in each category that are past due 90 days or more or that are in nonaccrual status.

# INSURANCE FUND INDICATORS

**Deposit Insurance Fund Increases by $3.6 Billion**

**DIF Reserve Ratio Rises 1 Basis Point, Ends First Quarter at 1.43 Percent**

**One Institution Failed During the First Quarter**

During the first quarter, the Deposit Insurance Fund (DIF) balance increased by $3.6 billion to $157.4 billion. The rise in the DIF was primarily driven by assessment income of $3.1 billion, followed by $1.2 billion in interest earned on investment securities. Growth to the DIF over the quarter was partially offset by unrealized losses on available-for-sale securities of $280 million and operating expenses of $526 million. One institution failed during the first quarter.

The deposit insurance assessment base—average consolidated total assets minus average tangible equity—increased by 1.8 percent in the first quarter and is above balances reported a year ago by 5.4 percent.

The quarterly change to total estimated insured deposits was 1.7 percent for the first quarter, and remains above balances reported a year ago by 2.0 percent. The DIF's reserve ratio (the fund balance as a percent of insured deposits) was 1.43 percent on March 31, 2026, up 1 basis point from the previous quarter and 12 basis points higher than the previous year.

# NOTES TO USERS

This publication contains financial data and other information for depository institutions insured by the Federal Deposit Insurance Corporation (FDIC). These notes are an integral part of this publication and provide information regarding the comparability of source data and reporting differences over time.

## TABLES I-A THROUGH VIII-A.

The information presented in Tables I-A through VIII-A of the *FDIC Quarterly Banking Profile* is aggregated for all FDIC-insured Call Report filers, both commercial banks and savings institutions. Some tables are arrayed by groups of FDIC-insured institutions based on predominant types of asset concentration, while other tables aggregate institutions by asset size and geographic region. Quarterly and full-year data are provided for selected indicators, including aggregate condition and income data, performance ratios, condition ratios, and structural changes, as well as past-due, noncurrent, and charge-off information for loans outstanding and other assets.

## TABLES I-B THROUGH VI-B.

The information presented in Tables I-B through VI-B is aggregated for all FDIC-insured commercial banks and savings institutions meeting the criteria for community banks that were developed for the FDIC's *Community Banking Study*, published in December, 2012: https://www.fdic.gov/resources/community-banking/cbi-study.html.

The determination of which insured institutions are considered community banks is based on five steps.

The first step in defining a community bank is to aggregate all charter-level data reported under each holding company into a single banking organization. This aggregation applies both to balance-sheet measures and the number and location of banking offices. Under the FDIC definition, if the banking organization is designated as a community bank, every charter reporting under that organization is also considered a community bank when working with data at the charter level.

The second step is to exclude any banking organization where more than 50 percent of total assets are held in certain specialty banking charters, including credit card specialists, consumer nonbank banks, industrial loan companies, trust companies, bankers' banks, and banks holding 10 percent or more of total assets in foreign offices.

Once the specialty organizations are removed, the third step involves including organizations that engage in basic banking activities as measured by the total loans-to-assets ratio (greater than 33 percent) and the ratio of core deposits to assets (greater than 50 percent). Core deposits are defined as non-brokered deposits in domestic offices. Analysis of the underlying data shows that these thresholds establish meaningful levels of basic lending and deposit gathering and still allow for a degree of diversity in how individual banks construct their balance sheets.

The fourth step includes organizations that operate within a limited geographic scope. This limitation of scope is used as a proxy measure for a bank's relationship approach to banking. Banks that operate within a limited market area have more ease in managing relationships at a personal level. Under this step, four criteria are applied to each banking organization. They include both a minimum and maximum number of total banking offices, a maximum level of deposits for any one office, and location-based criteria. The limits on the number of and deposits per office are adjusted upward quarterly. See the spreadsheet titled "Adjusted Community Bank Thresholds" on this webpage to see the limit in any given quarter. The remaining geographic limitations are also based on maximums for the number of states (fixed at three) and large metropolitan areas (fixed at two) in which the organization maintains offices. Branch office data are based on the most recent data from the annual June 30 Summary of Deposits Survey that are available at the time of publication.

Finally, the definition establishes an asset-size limit, also adjusted upward quarterly and below which the limits on banking activities and geographic scope are waived. See the spreadsheet titled "Adjusted Community Bank Thresholds" on this webpage to see the limit in any given quarter. This final step acknowledges the fact that most of those small banks that are not excluded as specialty banks meet the requirements for banking activities and geographic limits in any event.

## SUMMARY OF FDIC RESEARCH DEFINITION OF COMMUNITY BANKING ORGANIZATIONS

Community banks are designated at the level of the banking organization.

(All charters under designated holding companies are considered community banking charters.)

**Exclude:** Any organization with:

— No loans or no core deposits

— Assets held in foreign branches ≥ 10 percent of total assets

— More than 50 percent of assets in certain specialty banks, including:

- credit card specialists
- consumer nonbank banks[1]
- industrial loan companies
- trust companies
- bankers' banks

**Include:** All remaining banking organizations with:

— Total assets < indexed size threshold[2]

— Total assets ≥ indexed size threshold, where:

- Loan to assets > 33 percent
- Core deposits to assets > 50 percent
- More than 1 office but no more than the indexed maximum number of offices.[2]
- Number of large MSAs with offices ≤ 2
- Number of states with offices ≤ 3
- No single office with deposits > indexed maximum branch deposit size.[2]

## TABLES I-C THROUGH IV-C.

A separate set of tables (Tables I-C through IV-C) provides comparative quarterly data related to the Deposit Insurance Fund (DIF), problem institutions, failed institutions, estimated FDIC-insured deposits, and assessment rate information. Depository institutions that are not insured by the FDIC through the DIF are not included in the *FDIC Quarterly Banking Profile.* U.S. branches of institutions headquartered in foreign countries and non-deposit trust companies are not included unless otherwise indicated. Efforts are made to obtain financial reports for all active institutions. However,

[1] Consumer nonbank banks are financial institutions with limited charters that can make commercial loans or take deposits, but not both.

[2] See the spreadsheet titled "Adjusted Community Bank Thresholds" on this webpage to see the limit in any given quarter.

in some cases, final financial reports are not available for institutions that have closed or converted their charters.

## DATA SOURCES

The financial information appearing in this publication is obtained primarily from the Federal Financial Institutions Examination Council (FFIEC) *Consolidated Reports of Condition and Income (Call Reports)* and the OTS *Thrift Financial Reports* (TFR) submitted by all FDIC-insured depository institutions. TFR filers began filing Call Reports effective with the quarter ending March 31, 2012. This information is stored on and retrieved from the FDIC's Research Information System (RIS) database.

## COMPUTATION METHODOLOGY

Parent institutions are required to file consolidated reports, while their subsidiary financial institutions are still required to file separate reports. Data from subsidiary institution reports are included in the *Quarterly Banking Profile* tables, which can lead to double-counting. No adjustments are made for any double-counting of subsidiary data. Additionally, certain adjustments are made to the OTS *Thrift Financial Reports* to provide closer conformance with the reporting and accounting requirements of the FFIEC *Call Reports.*

All condition and performance ratios are weighted averages, which is the sum of the individual numerator values divided by the sum of individual denominator values. All asset and liability figures used in calculating performance ratios represent average amounts for the period (beginning-of-period amount plus end-of-period amount plus any interim periods, divided by the total number of periods). For "pooling-of-interest" mergers, the assets of the acquired institution(s) are included in average assets, since the year-to-date income includes the results of all merged institutions. No adjustments are made for "purchase accounting" mergers. Growth rates represent the percentage change over a 12-month period in totals for institutions in the base period to totals for institutions in the current period. For the community bank subgroup, growth rates will reflect changes over time in the number and identities of institutions designated as community banks, as well as changes in the assets and liabilities, and income and expenses of group members. Unless indicated otherwise, growth rates are not adjusted for mergers or other changes in the composition of the community bank subgroup. When community bank growth rates are adjusted for mergers, prior period balances used in the calculations represent totals for the current group of community bank reporters, plus prior period amounts for any institutions that were subsequently merged into current community banks.

All data are collected and presented based on the location of each reporting institution's main office. Reported data may include assets and liabilities located outside of the reporting institution's home state. In addition, institutions may relocate across state lines or change their charters, resulting in an inter-regional or inter-industry migration; institutions can move their home offices between regions, savings institutions can convert to commercial banks, or commercial banks may convert to savings institutions.

## ACCOUNTING CHANGES

Financial accounting pronouncements by the Financial Accounting Standards Board (FASB) can result in changes in an individual bank's accounting policies and in the Call Reports they submit. Such accounting changes can affect the aggregate amounts presented in the QBP for the current period and the period-to-period comparability of such financial data.

The FDIC's Financial Institution Letter (FIL) repository can be found here, in which the current quarter's FIL and related Call Report supplemental instructions can provide additional explanation to the QBP reader beyond any material accounting changes discussed in the QBP analysis. Further information on changes in financial statement presentation, income recognition, and disclosure is available from the FASB.

## DEFINITIONS (IN ALPHABETICAL ORDER)

**All other assets** – total cash, balances due from depository institutions, premises, fixed assets, direct investments in real estate, investment in unconsolidated subsidiaries, customers' liability on acceptances outstanding, assets held in trading accounts, federal funds sold, securities purchased with agreements to resell, fair market value of derivatives, prepaid deposit insurance assessments, and other assets.

**All other liabilities** – bank's liability on acceptances, limited-life preferred stock, allowance for estimated off-balance-sheet credit losses, fair market value of derivatives, and other liabilities.

**Assessment base** – Effective April 1, 2011, the deposit insurance assessment base changed to "average consolidated total assets minus average tangible equity" with an additional adjustment to the assessment base for banker's banks and custodial banks. Previously, the assessment base consisted of deposit liabilities after exclusions.

**Assessment rate schedule** – Initial base assessment rates for small institutions (except new institutions) are based on a combination of financial ratios and CAMELS component ratings. Initial rates for large institutions—generally those with at least $10 billion in assets—are also based on CAMELS component ratings and certain financial measures combined into two scorecards—one for most large institutions and another for the remaining very large institutions that are structurally and operationally complex or that pose unique challenges and risks in case of failure (highly complex institutions). The FDIC may take additional information into account to make a limited adjustment to a large institution's scorecard results, which are used to determine a large institution's initial base assessment rate.

Initial rates for small institutions are subject to minimums and maximums based on an institution's CAMELS composite rating.

The current assessment rate schedule became effective January 1, 2023. Under the current schedule, initial base assessment rates range from 5 to 32 basis points. An institution's total base assessment rate may differ from its initial rate due to three possible adjustments: (1) Unsecured Debt Adjustment: An institution's rate may decrease by up to 5 basis points for unsecured debt. The unsecured debt adjustment cannot exceed the lesser of 5 basis points or 50 percent of an institution's initial base assessment rate (IBAR). For example, an institution with an IBAR of 5 basis points would have a maximum unsecured debt adjustment of 2.5 basis points and could not have a total base assessment rate lower than 2.5 basis points. (2) Depository Institution Debt Adjustment: For institutions that hold long-term unsecured debt issued by another insured depository institution, a 50 basis point charge is applied to the amount of such debt held in excess of 3 percent of an institution's tier 1 capital. (3) Brokered Deposit Adjustment: Rates for large institutions that are not well-capitalized or do not have a composite CAMELS rating of 1 or 2 may increase (not to exceed 10 basis points) if their brokered deposits exceed 10 percent of domestic deposits.

The assessment rate schedule effective January 1, 2023, is shown in the following table:

**Total Base Assessment Rates***

| | Established Small Banks CAMELS Composite | | | Large and Highly Complex Institutions |
|---|---|---|---|---|
| | 1 or 2 | 3 | 4 or 5 | |
| Initial base assessment rate | 5 to 18 | 8 to 32 | 18 to 32 | 5 to 32 |
| Unsecured debt adjustment | –5 to 0 | –5 to 0 | –5 to 0 | –5 to 0 |
| Brokered deposit adjustment | N/A | N/A | N/A | 0 to 10 |
| Total base assessment rate | 2.5 to 18 | 4 to 32 | 13 to 32 | 2.5 to 42 |

* All amounts for all categories are in basis points annually. Total base rates that are not the minimum or maximum rate will vary between these rates. Total base assessment rates do not include the depository institution debt adjustment.

Each institution is assigned a risk-based rate for a quarterly assessment period near the end of the quarter following the assessment period. Payment is generally due on the 30th day of the last month of the quarter following the assessment period. Supervisory rating changes are effective for assessment purposes as of the examination transmittal date.

**Assets securitized and sold** – total outstanding principal balance of assets securitized and sold with servicing retained or other seller-provided credit enhancements.

**Common equity tier 1 capital ratio** – ratio of common equity tier 1 capital to risk-weighted assets. Common equity tier 1 capital includes common stock instruments and related surplus, retained earnings, accumulated other comprehensive income (AOCI), and limited amounts of common equity tier 1 minority interest, minus applicable regulatory adjustments and deductions. Items that are fully deducted from common equity tier 1 capital include goodwill, other intangible assets (excluding mortgage servicing assets) and certain deferred tax assets; items that are subject to limits in common equity tier 1 capital include mortgage servicing assets, eligible deferred tax assets, and certain significant investments. Beginning March 2020, this ratio does not include institutions that have a Community Bank Leverage Ratio election in effect at the report date.

**Construction and development loans** – includes loans for all property types under construction, as well as loans for land acquisition and development.

**Core capital** – common equity capital plus noncumulative perpetual preferred stock plus minority interest in consolidated subsidiaries, less goodwill and other ineligible intangible assets. The amount of eligible intangibles (including servicing rights) included in core capital is limited in accordance with supervisory capital regulations.

**Cost of funding earning assets** – total interest expense paid on deposits and other borrowed money as a percentage of average earning assets.

**Credit enhancements** – techniques whereby a company attempts to reduce the credit risk of its obligations. Credit enhancement may be provided by a third party (external credit enhancement) or by the originator (internal credit enhancement), and more than one type of enhancement may be associated with a given issuance.

**Deposit Insurance Fund (DIF)** – the Bank Insurance Fund (BIF) and the Savings Association Insurance Fund (SAIF) were merged in 2006 by the Federal Deposit Insurance Reform Act to form the DIF.

**Deposit liabilities after exclusions** – amount equal to gross total deposit liabilities meeting the statutory definition of a deposit in Section 3(l) of the Federal Deposit Insurance Act, before deducting allowable exclusions. Deposit liabilities after exclusions may differ from amounts reported for total deposits or total domestic deposits due to adjustments made to align with the determination of deposit insurance coverage in the event of a bank failure, including reporting based on an unconsolidated single FDIC certificate number basis.

**Derivatives notional amount** – the notional, or contractual, amounts of derivatives represent the level of involvement in the types of derivatives transactions and are not a quantification of market risk or credit risk. Notional amounts represent the amounts used to calculate contractual cash flows to be exchanged.

**Derivatives credit equivalent amount** – the fair value of the derivative plus an additional amount for potential future credit exposure based on the notional amount, the remaining maturity and type of the contract.

**Derivatives transaction types:**

***Futures and forward contracts*** – contracts in which the buyer agrees to purchase, and the seller agrees to sell, at a specified future date, a specific quantity of an underlying variable or index at a specified price or yield. These contracts exist for a variety of variables or indices (traditional agricultural or physical commodities, as well as currencies and interest rates). Futures contracts are standardized and are traded on organized exchanges which set limits on counterparty credit exposure. Forward contracts do not have standardized terms and are traded over the counter.

***Option contracts*** – contracts in which the buyer acquires the right to buy from or sell to another party some specified amount of an underlying variable or index at a stated price (strike price) during a period or on a specified future date, in return for compensation (such as a fee or premium). The seller is obligated to purchase or sell the variable or index at the discretion of the buyer of the contract.

***Swaps*** – obligations between two parties to exchange a series of cash flows at periodic intervals (settlement dates) for a specified period. The cash flows of a swap are either fixed or determined for each settlement date by multiplying the quantity (notional principal) of the underlying variable or index by specified reference rates or prices. Except for currency swaps, the notional principal is used to calculate each payment but is not exchanged.

**Derivatives underlying risk exposure** – the potential exposure characterized by the level of banks' concentration in particular underlying instruments, in general. Exposure can result from market risk, credit risk, operational risk, and interest rate risk.

**Domestic deposits to total assets** – total domestic office deposits as a percent of total assets on a consolidated basis.

**Earning assets** – all loans and other investments that earn interest or dividend income.

**Efficiency ratio** – noninterest expense less amortization of intangible assets as a percent of net interest income plus noninterest income. This ratio measures the proportion of net operating revenues that are absorbed by overhead expenses, so that a lower value indicates greater efficiency.

**Estimated insured deposits** – In general, insured deposits are total deposit liabilities after exclusions minus estimated uninsured deposits. Beginning September 30, 2009, insured deposits reflect an increase in the FDIC's standard maximum deposit insurance amount from $100,000 to $250,000. From December 31, 2010, through December 31, 2012, insured deposits also include all funds held in noninterest-bearing transaction accounts, without limit.

**Estimated uninsured deposits** – In general, institutions with $1 billion or more in total assets report estimated uninsured deposits in domestic offices of the bank and in insured branches in U.S. territories and possessions, including related interest accrued and unpaid. For institutions that do not report estimated uninsured deposits, the FDIC calculates this amount as the amount of deposit and retirement accounts with balances greater than the standard maximum deposit insurance amount (SMDIA), currently $250,000, minus the portion that is insured. The amount that is insured is estimated by multiplying the number of accounts with balances greater than the SMDIA, as reported on the Call Report, by the SMDIA. For example, under the current SMDIA, if an institution reports 1,000 deposit and retirement accounts with balances greater than $250,000 and an aggregate total of $500 million, the FDIC would calculate the estimated uninsured deposits as $250 million ($500,000,000 – (1,000 * $250,000)).

**Failed/assisted institutions** – An institution fails when regulators take control of the institution, placing the assets and liabilities into a bridge bank, conservatorship, receivership, or another healthy institution. This action may require the FDIC to provide funds to cover losses. An institution is defined as "assisted" when the institution remains open and receives assistance in order to continue operating.

**Fair value** – the valuation of various assets and liabilities on the balance sheet—including trading assets and liabilities, available-for-sale securities, loans held for sale, assets and liabilities accounted for under the fair value option, and foreclosed assets—involves the use of fair values. During periods of market stress, the fair values of some financial instruments and nonfinancial assets may decline.

**FHLB advances** – all borrowings by FDIC-insured institutions from the Federal Home Loan Bank System (FHLB), as reported by Call Report filers, and by TFR filers prior to March 31, 2012.

**Goodwill and other intangibles** – Intangible assets include servicing rights, purchased credit card relationships, and other identifiable intangible assets. Goodwill is the excess of the purchase price over the fair market value of the net assets acquired, less subsequent impairment adjustments. Other intangible assets are recorded at fair value, less subsequent quarterly amortization and impairment adjustments.

**Liquidity ratio** – liquid assets to total assets. Liquid assets include cash, federal funds sold, securities purchased under agreements to resell, and securities (including unrealized gains/losses on securities) less pledged securities.

**Loans secured by real estate** – includes home equity loans, junior liens secured by 1–4 family residential properties, and all other loans secured by real estate.

**Loans to individuals** – includes outstanding credit card balances and other secured and unsecured consumer loans.

**Long-term assets (5+ years)** – loans and debt securities with remaining maturities or repricing intervals of more than five years.

**Maximum credit exposure** – the maximum contractual credit exposure remaining under recourse arrangements and other seller-provided credit enhancements provided by the reporting bank to securitizations.

**Mortgage-backed securities** – certificates of participation in pools of residential mortgages and collateralized mortgage obligations issued or guaranteed by government-sponsored or private enterprises. Also, see "Securities," on the next page.

**Net charge-offs** – total loans and leases charged off (removed from balance sheet because of uncollectability), less amounts recovered on loans and leases previously charged off.

**Net interest margin** – the difference between interest and dividends earned on interest-bearing assets and interest paid to depositors and other creditors, expressed as a percentage of average earning assets. No adjustments are made for interest income that is tax exempt.

**Net loans to total assets** – loans and lease financing receivables, net of unearned income, allowance and reserves, as a percent of total assets on a consolidated basis.

**Net operating income** – income excluding discretionary transactions such as gains (or losses) on the sale of investment securities and extraordinary items. Income taxes subtracted from operating income have been adjusted to exclude the portion applicable to securities gains (or losses).

**Noncurrent assets** – the sum of loans, leases, debt securities, and other assets that are 90 days or more past due, or in nonaccrual status.

**Noncurrent loans and leases** – the sum of loans and leases 90 days or more past due, and loans and leases in nonaccrual status.

**Number of institutions reporting** – the number of institutions that actually filed a financial report.

**New reporters** – insured institutions filing quarterly financial reports for the first time.

**Other borrowed funds** – federal funds purchased, securities sold with agreements to repurchase, demand notes issued to the U.S. Treasury, FHLB advances, other borrowed money, mortgage indebtedness, obligations under capitalized leases and trading liabilities, less revaluation losses on assets held in trading accounts.

**Other real estate owned** – primarily foreclosed property. Direct and indirect investments in real estate ventures are excluded. The amount is reflected net of valuation allowances. For institutions that filed a *Thrift Financial Report* (TFR), the valuation allowance subtracted also includes allowances for other repossessed assets. Also, for TFR filers the components of other real estate owned are reported gross of valuation allowances. TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.

**Percent of institutions with earnings gains** – the percent of institutions that increased their net income (or decreased their losses) compared to the same period a year earlier.

**"Problem" institutions** – Federal regulators assign a composite rating to each financial institution, based upon an evaluation of financial and operational criteria. The rating is based on a scale of 1 to 5 in ascending order of supervisory concern. "Problem" institutions are rated either a "4" or "5," depending upon the degree of risk and supervisory concern. The number of "problem" institutions is based on FDIC composite ratings. Before March 31, 2008, for institutions whose primary federal regulator was the OTS, the OTS composite rating was used.

**Recourse** – an arrangement in which a bank retains, in form or in substance, any credit risk directly or indirectly associated with an asset it has sold (in accordance with generally accepted accounting principles) that exceeds a pro rata share of the bank's claim on the asset. If a bank has no claim on an asset it has sold, then the retention of any credit risk is recourse.

**Reserves for losses** – the allowance for loan and lease losses on a consolidated basis.

**Restructured loans and leases** – loan and lease financing receivables with terms restructured from the original contract. Excludes restructured loans and leases that are not in compliance with the modified terms.

**Retained earnings** – net income less cash dividends on common and preferred stock for the reporting period.

**Return on assets** – bank net income (including gains or losses on securities and extraordinary items) as a percentage of average total (consolidated) assets. The basic yardstick of bank profitability.

**Return on equity** – bank net income (including gains or losses on securities and extraordinary items) as a percentage of average total equity capital.

**Risk-weighted assets** – assets adjusted for risk-based capital definitions which include on-balance-sheet as well as off-balance-sheet items multiplied by risk-weights that range from zero to 200 percent. A conversion factor is used to assign a balance sheet equivalent amount for selected off-balance-sheet accounts.

**Securities** – excludes securities held in trading accounts. Banks' securities portfolios consist of securities designated as "held-to-maturity" (reported at amortized cost (book value)), securities designated as "available-for-sale" (reported at fair (market) value), and equity securities with readily determinable fair values not held for trading.

**Securities gains (losses)** – realized gains (losses) on held-to-maturity and available-for-sale securities, before adjustments for income taxes. *Thrift Financial Report* (TFR) filers also include gains (losses) on the sales of assets held for sale. TFR filers began filing Call Reports effective with the quarter ending March 31, 2012.

**Seller's interest in institution's own securitizations** – the reporting bank's ownership interest in loans and other assets that have been securitized, except an interest that is a form of recourse or other seller-provided credit enhancement. Seller's interests differ from the securities issued to investors by the securitization structure. The principal amount of a seller's interest is generally equal to the total principal amount of the pool of assets included in the securitization structure less the principal amount of those assets attributable to investors, i.e., in the form of securities issued to investors.

**Subchapter S corporation** – A Subchapter S corporation is treated as a pass-through entity, similar to a partnership, for federal income tax purposes. It is generally not subject to any federal income taxes at the corporate level. This can have the effect of reducing institutions' reported taxes and increasing their after-tax earnings.

**Trust assets** – market value, or other reasonably available value of fiduciary and related assets, to include marketable securities and other financial and physical assets. Common physical assets held in fiduciary accounts include real estate, equipment, collectibles, and household goods. Such fiduciary assets are not included in the assets of the financial institution.

**Unearned income and contra accounts** – unearned income for *Call Report* filers only.

**Unused loan commitments** – includes credit card lines, home equity lines, commitments to make loans for construction, loans secured by commercial real estate, and unused commitments to originate or purchase loans. (Excluded are commitments after June 2003 for originated mortgage loans held for sale, which are accounted for as derivatives on the balance sheet.)

**Yield on earning assets** – total interest, dividend, and fee income earned on loans and investments as a percentage of average earning assets.
